# LEE MEMORIAL HEALTH SYSTEM

## Lee Memorial Health System at Coconut Point

### Vision Statement

Lee Memorial Health System at Coconut Point will be a **health and wellness destination** for residents of Southwest Florida, offering a broad array of medical services across the continuum of care in a **pleasing campus environment / retail setting** that combine to create an excellent experience and healing environment.

### Concept

Lee Memorial Health System is developing an innovative healthcare campus to meet community health needs and address service gaps in southern Lee County.

Collectively, the services on the campus will focus on health, healing, and treatment; with teams working together to keep an individual out of an acute care hospital. Patients will experience a high level of convenience through the “five ones” of health care connectivity -- one registration, one point of scheduling, one combined schedule of care, one electronic medical record, and one patient portal.

### Services & Programs to be Offered

- ❖ A **freestanding emergency department will be open 24/7/365** for the treatment of urgent and emergent medical conditions. The ED will be staffed with similar trained medical personnel and modern diagnostic equipment available in Lee Memorial Health System’s acute care hospital-based emergency rooms.
- ❖ **Short Stay observation and recovery beds** will support the Emergency Department and Surgery Center. A patient in these beds can be held for observation, assessment and treatment.
- ❖ A **Healthy Life Center** will provide health assessments and education, chronic disease management, holistic health services, and care coordination among other offerings.
- ❖ A **Medical Office Complex** will have space for primary care physicians and specialists.
- ❖ Other services will include a **surgery center, imaging, laboratory, cardiac testing, and rehab services.**

### Project Overview

- 31-acre site located south of Coconut Point Mall and adjacent to the Bonita Community Health Center
- Projected opening: 2017
