RE: DCI2014-00022
Corkscrew Crossing

Dear Ms. Gibbs:

This letter is in response to your request for comments dated August 13, 2018 for Corkscrew Crossing in regard to educational impact. The project is located in the South Choice Zone S3.

The current zoning allows for 130 single-family units and 594 multi-family totaling 725 dwelling units. The original request proposed zoning for 563 single-family and 62 multi-family for a total of 625. The re-submittal requests a maximum of 625 dwelling units of varying types with no clarification as to how many of each, therefore, single family will be utilized for the purpose of determining capacity. With regard to the interlocal agreement for school concurrency the generation rates are created from the type of dwelling unit and further broken down by grade level.

For single-family, the generation rate is .29 and further broken down into the following, .149 for elementary, .071 for middle and .077 for high. A total of 78 school-aged children would be generated and utilized for the purpose of determining sufficient capacity to serve the development.

The Concurrency Analysis attached displays the impact of this development and there are sufficient seats available to serve the need within the Concurrency Service Area (CSA).

Thank you and if I may be of further assistance, please call me at 239-337-8142.

Sincerely,

Dawn Huff
