# ESTERO PARKWAY

Village of Estero

Landscape Design and  
Plant Selection

## Project Scope

## US 41 to Three Oaks Parkway – Overall Landscape Plan

# South Florida Water Management – Water Wise Florida

As we have been talking about since the beginning of our design involvement, the treatment of the water storage areas (swales) dictates how we choose the appropriate plantings. As such, one of our main resources has been the Water Wise Florida booklet as referenced above. They go into great detail delineating trees, shrubs, and ground covers, capable of thriving in different wet/dry conditions.

Quoting from the Water Wise document talking about Xeriscape Landscaping,

*"The main objective of Xeriscape is to establish and maintain a healthy landscape by matching the right plants with existing site conditions so that the use of additional resources, such as water, fertilizer, pesticides and labor, is minimized."*

We chose this reference (to right) that carefully delineates which plants can handle the different moisture levels. In our scenario, which is mostly about the storage of water in the drainage swales, we are more concerned about plants drowning than we are about a lack of water or more specifically 'drought tolerant'.

Blueberry, evergreen	<i>Vaccinium darrowii</i>	8a-11			2	
Blueberry, highbush	<i>Vaccinium corymbosum</i>	8a-11			10	
Blueberry, shiny	<i>Vaccinium myrsinites</i>	8a-11			2	
Bottlebrush, lemon	<i>Callistemon citrinus</i>	9a-11			20	
Bottlebrush, stiff	<i>Callistemon rigidus</i>	9a-11			15	
Bougainvillea, paper flower	<i>Bougainvillea glabra</i>	10b-11			8	
Boxthorn	<i>Severinia buxifolia</i>	9a-10b			6	
Buckthorn, tough	<i>Sideroxylon tenax</i> (= <i>Bumelia tenax</i> )	8b-9b			20	
Bush clock vine	<i>Thunbergia erecta</i>	10b-11			5	
Butterfly-bush	<i>Buddleja asiatica</i>	9b			10	
Buttonbush	<i>Cephalanthus occidentalis</i>	8a-10a			15	
Calamondin orange	<i>x Citrofortunella microcarpa</i>	10b-11			10-25	
Caper, Jamaican	<i>Capparis cynophallophora</i>	10b-11			9	
Caricature plant	<i>Graptophyllum pictum</i>	10b-11			5	
Carolina silverbell	<i>Halesia carolina</i>	8a-9b			25	
Cassia, Bahama	<i>Senna mexicana</i> var. <i>chapmanii</i>	10a			8	
Century plant, maguey	<i>Agave americana</i>	9a-11			6+	

SOIL MOISTURE  Dry  Moist  Wet

LIGHT  Full Sun  Partial Sun  Shade

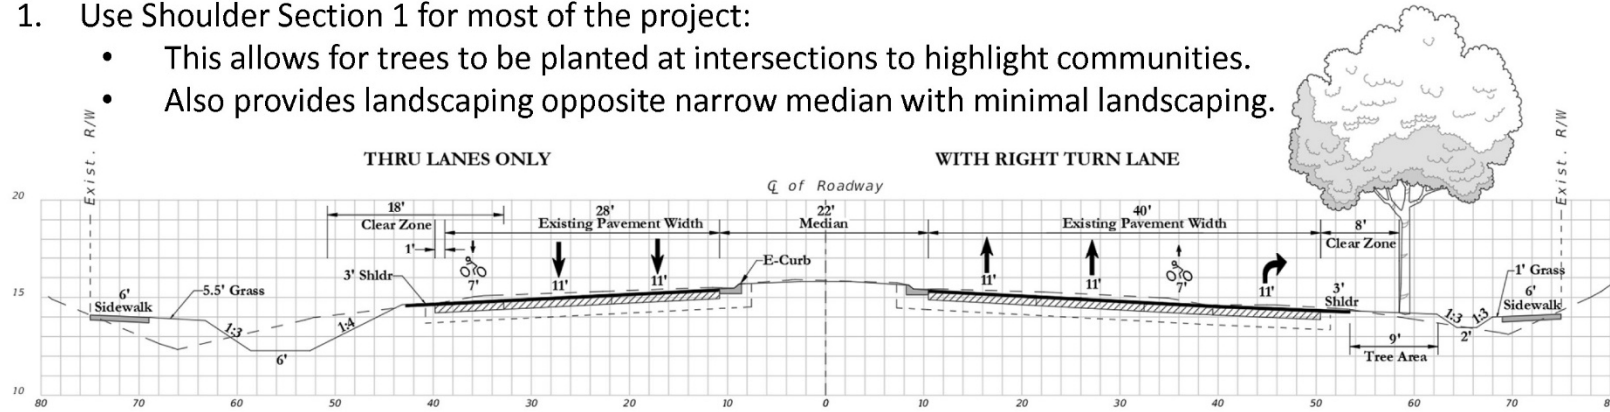

# Last Roadway Sections Approved by Council

## Shoulder Section Recommendations

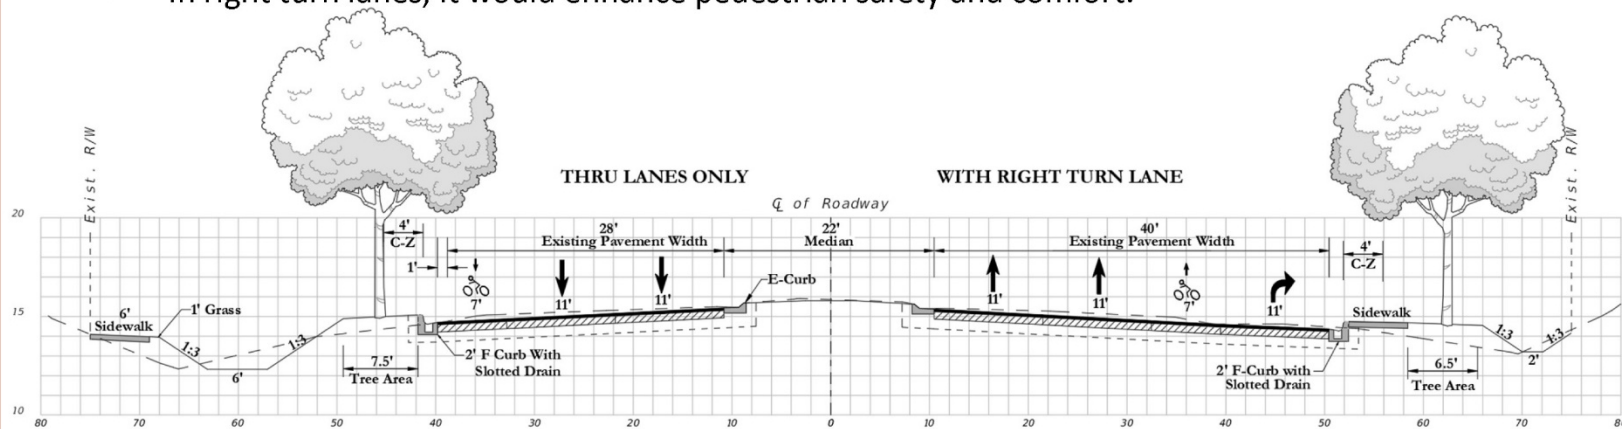

1. Use Shoulder Section 1 for most of the project:

- This allows for trees to be planted at intersections to highlight communities.
- Also provides landscaping opposite narrow median with minimal landscaping.

2. Shoulder Section 3 in select areas:

- In thru lanes, this could be added to create a meandering sidewalk and “mid-block” tree clusters.
- In right turn lanes, it would enhance pedestrian safety and comfort.

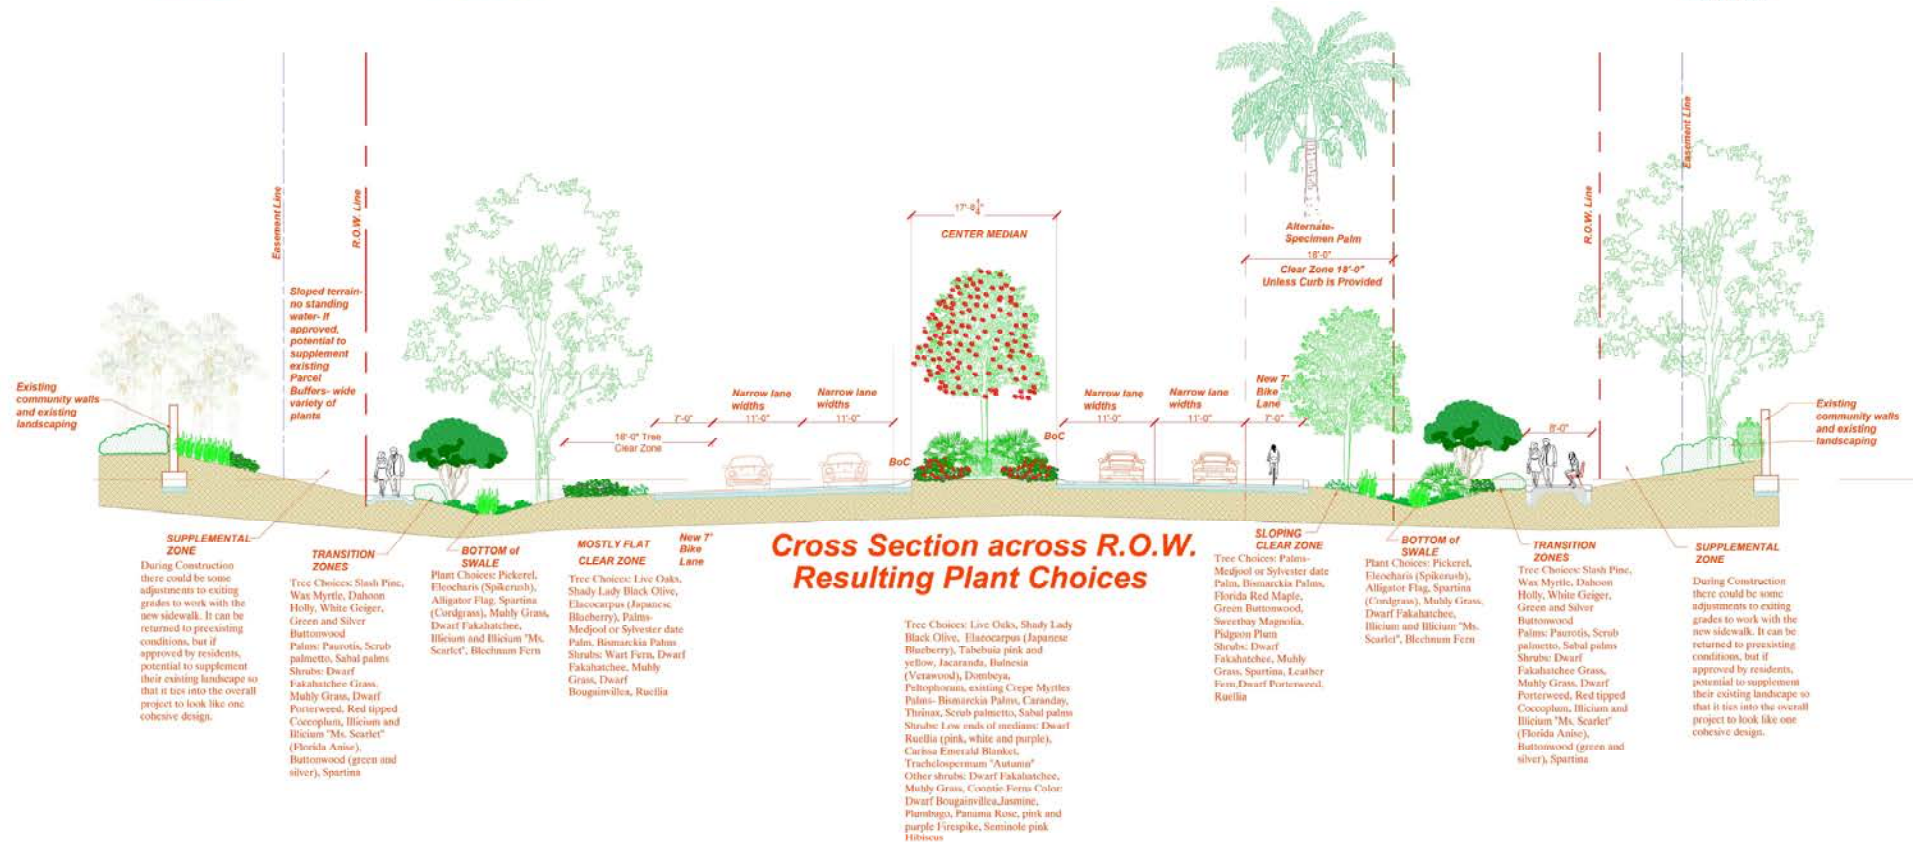

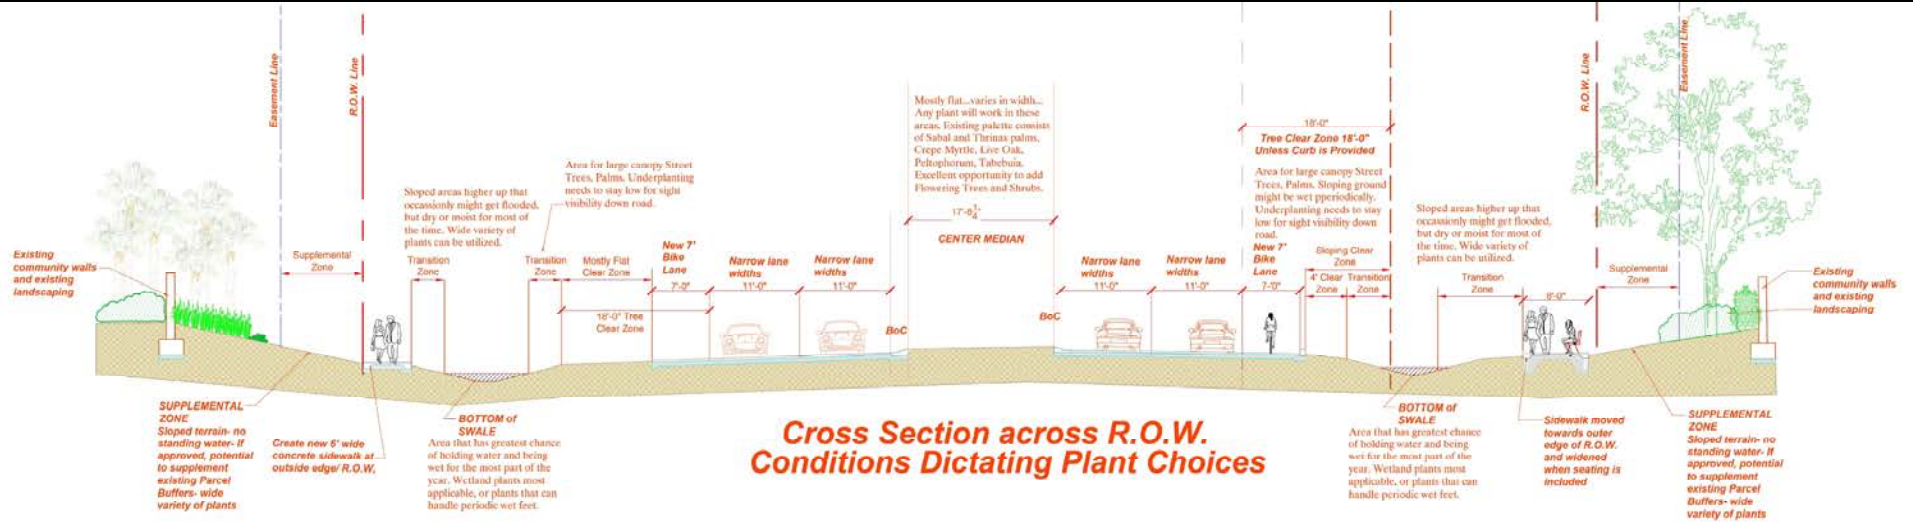

# Naturalized Swales

These storm water detention swales will have different water levels during the year. Understanding which plants can best handle these wet/dry conditions, ensures a successful planting plan. To naturalize this look, we have utilized multiple species of plants in proper combinations.

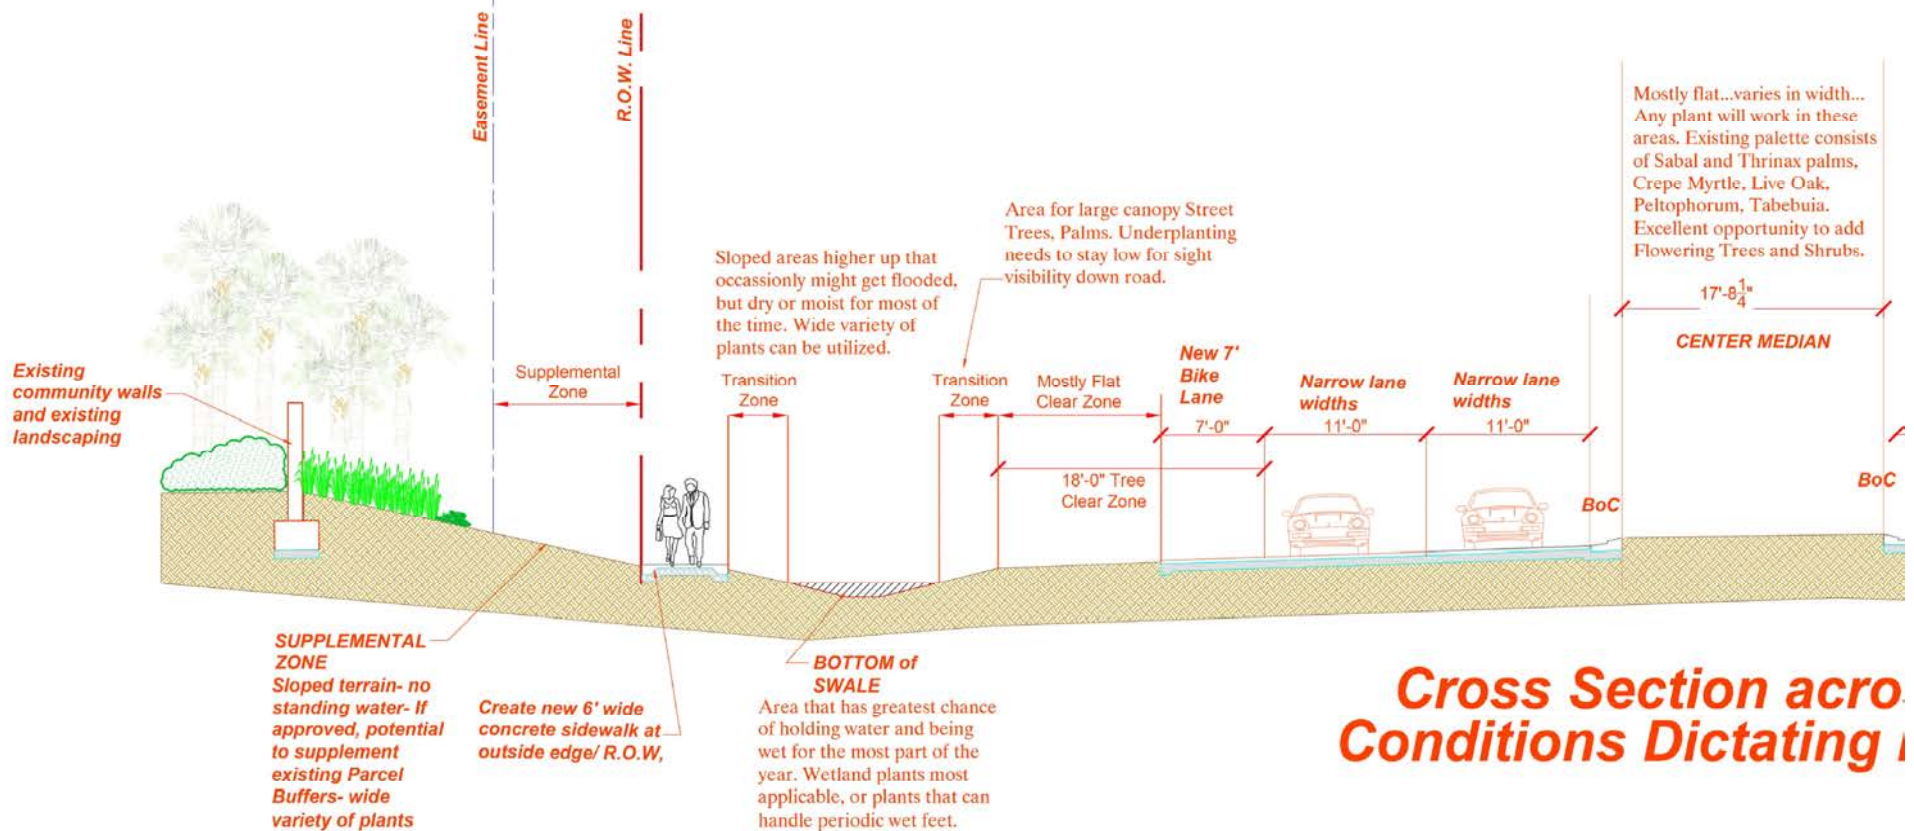

# R.O.W. Conditions Dictating Plant Choices

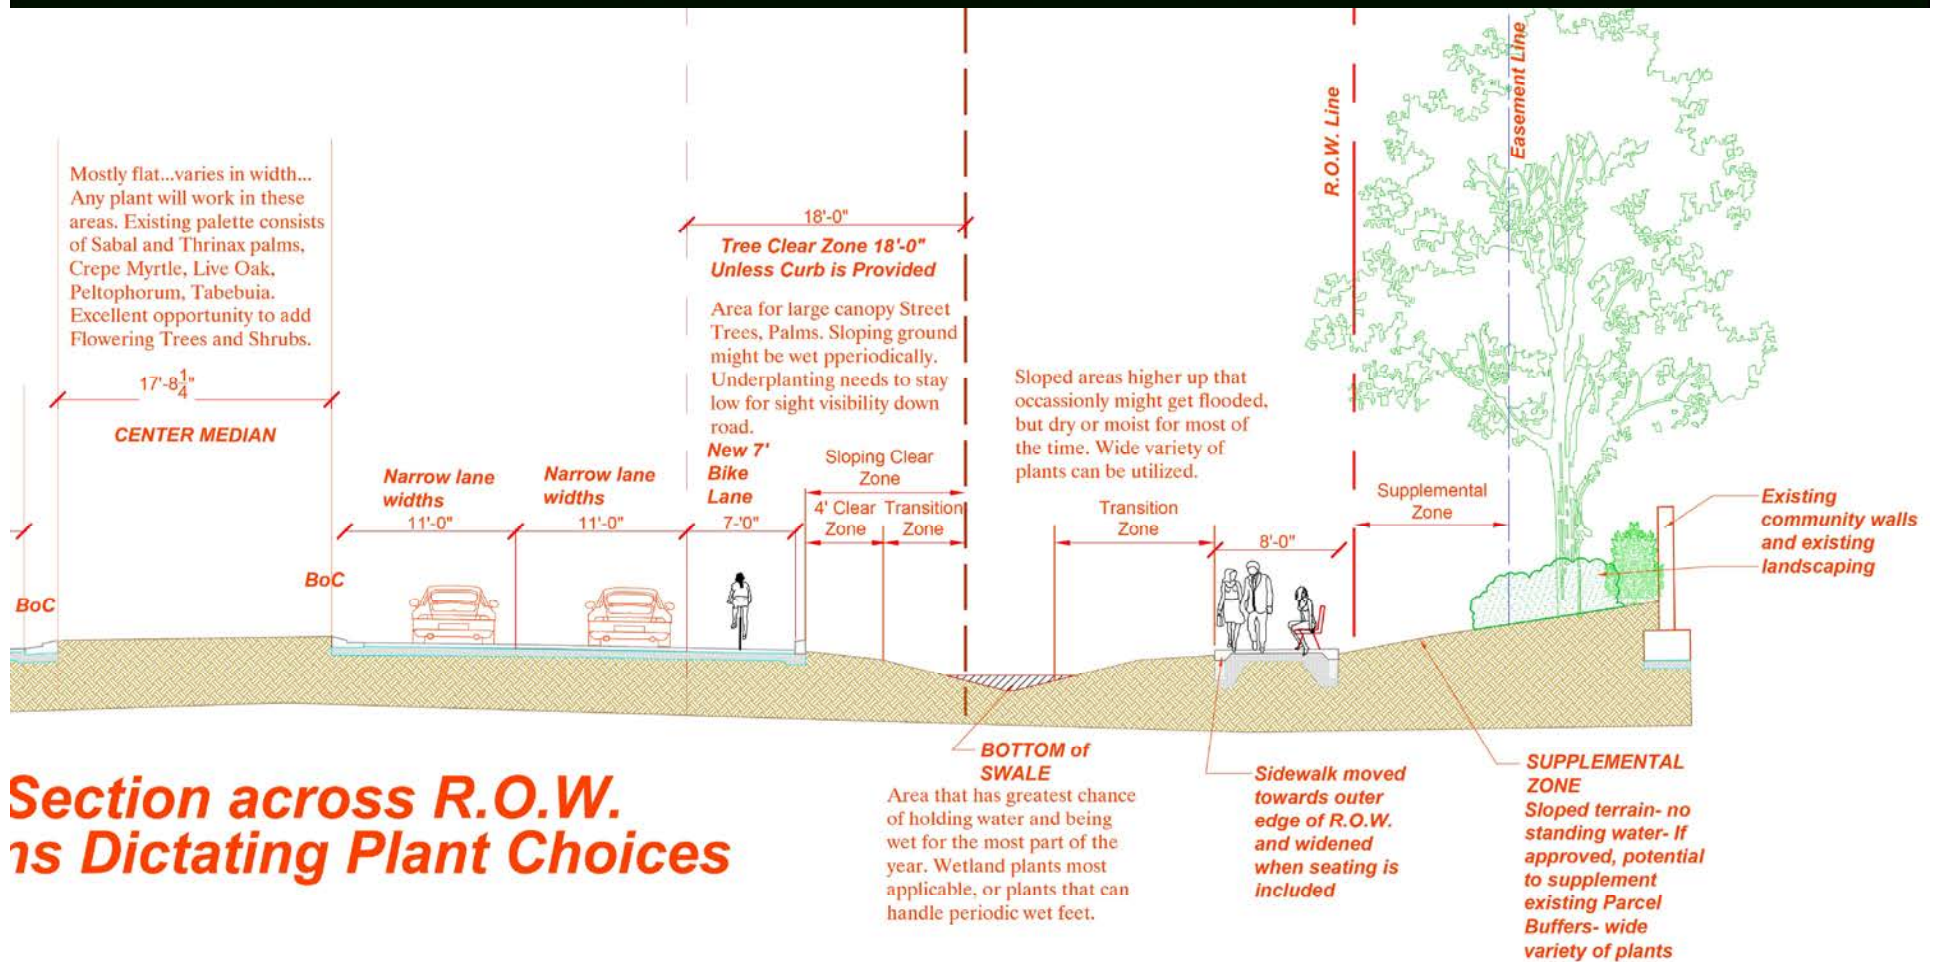

# R.O.W. Conditions Dictating Plant Choices

**Cross Section across  
Conditions Dictating**

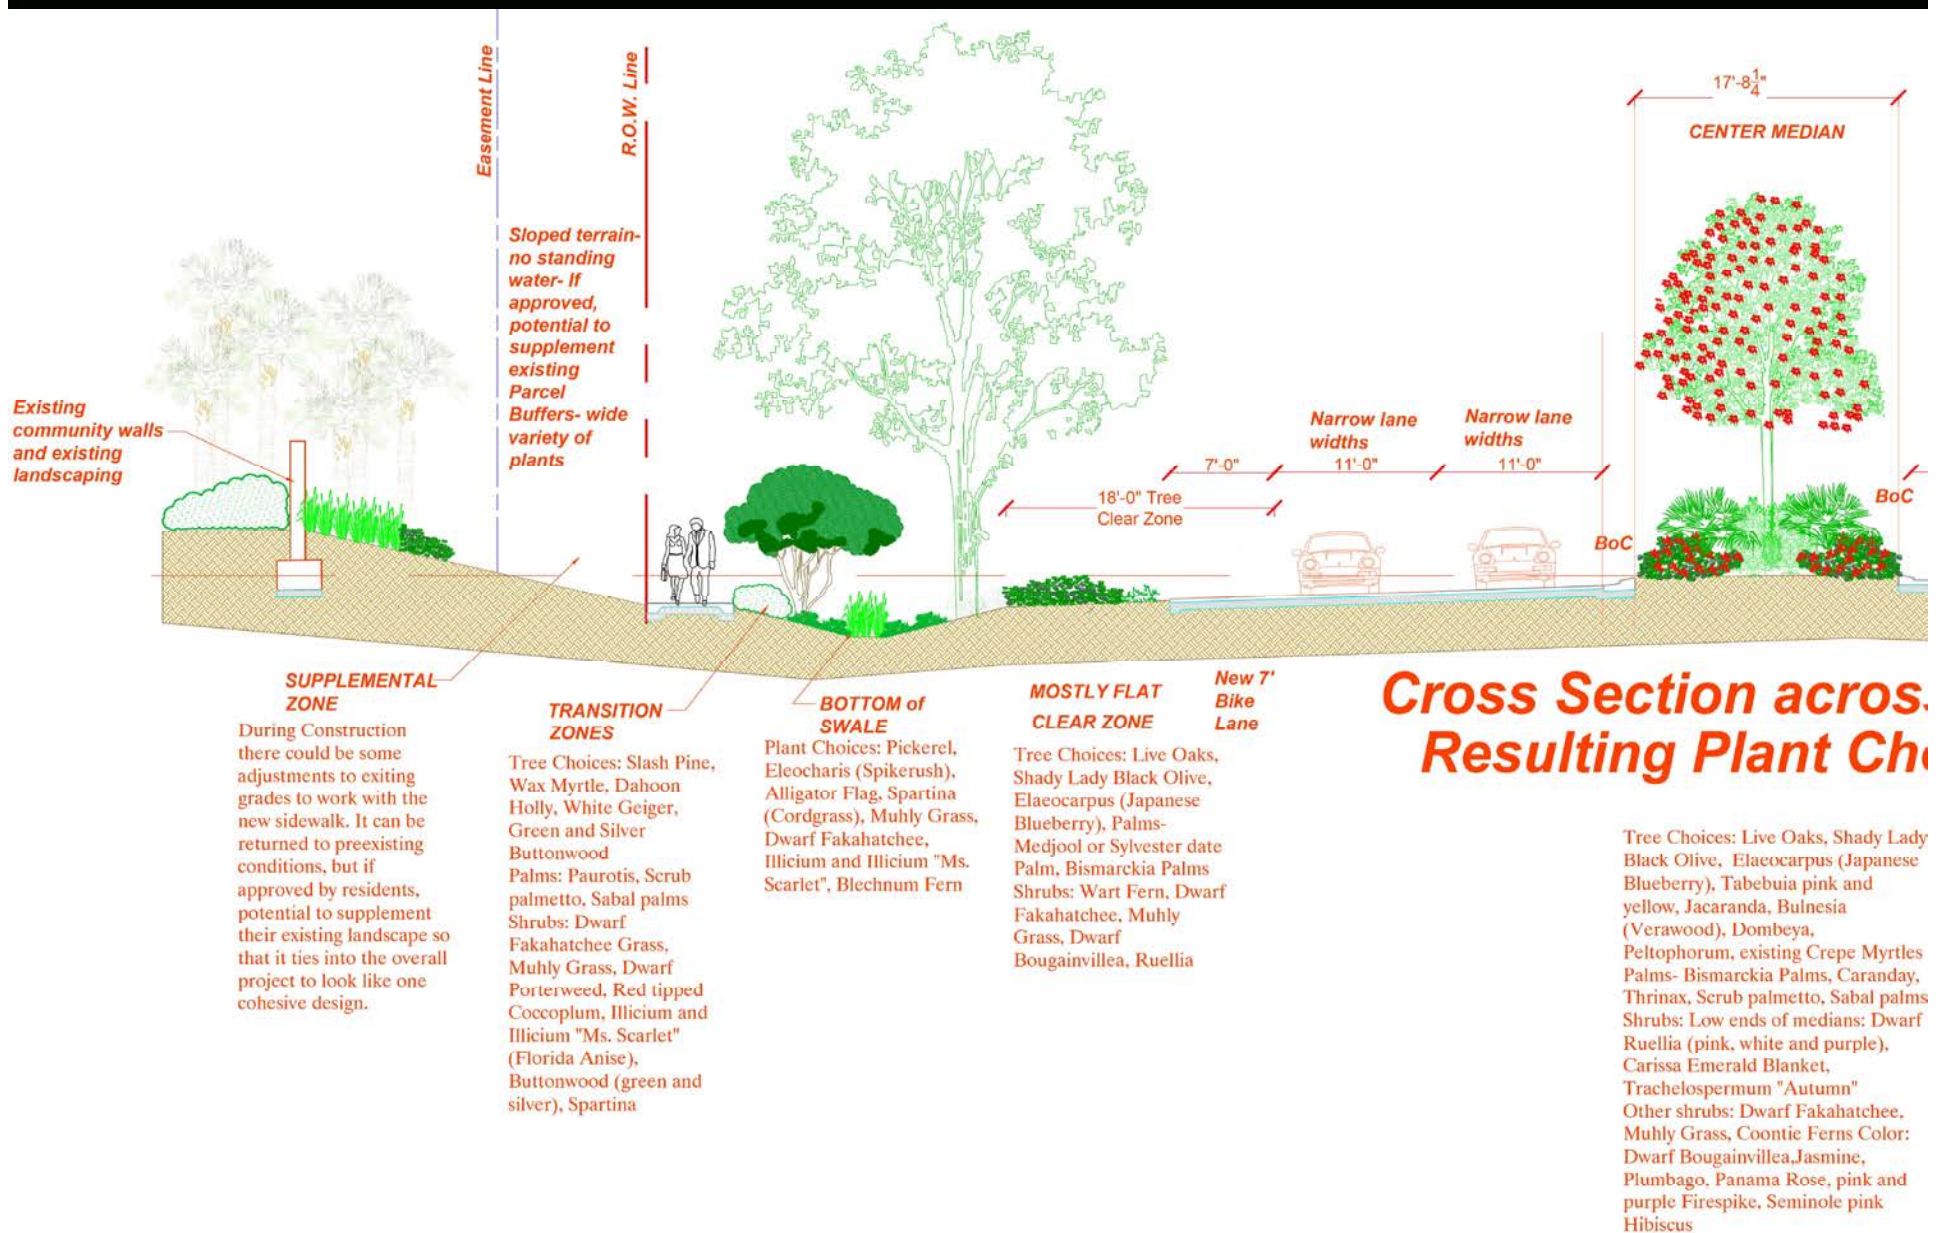

# R.O.W. Conditions Dictating Plant Choices

**Section across R.O.W.  
is Dictating Plant Choices**

# R.O.W. Conditions Dictating Plant Choices

# R.O.W. Conditions Dictating Plant Choices

## Section across R.O.W. Plant Choices

Tree Choices: Live Oaks, Shady Lady Black Olive, Elaeocarpus (Japanese Blueberry), Tabebuia pink and yellow, Jacaranda, Bulnesia (Verawood), Dombeya, Peltophorum, existing Crepe Myrtles  
Palms- Bismarckia Palms, Caranday, Thrinax, Scrub palmetto, Sabal palms  
Shrubs: Low ends of medians: Dwarf Ruellia (pink, white and purple), Carissa Emerald Blanket, Trachelospermum "Autumn"  
Other shrubs: Dwarf Fakahatchee, Muhly Grass, Coontie Ferns  
Color: Dwarf Bougainvillea, Jasmine, Plumbago, Panama Rose, pink and purple Firespike, Seminole pink Hibiscus

### SLOPING CLEAR ZONE

Tree Choices: Palms- Medjool or Sylvester date Palm, Bismarckia Palms, Florida Red Maple, Green Buttonwood, Sweetbay Magnolia, Pidgeon Plum  
Shrubs: Dwarf Fakahatchee, Muhly Grass, Spartina, Leather Fern, Dwarf Porterweed, Ruellia

### BOTTOM of SWALE

Plant Choices: Pickerel, Eleocharis (Spikerush), Alligator Flag, Spartina (Cordgrass), Muhly Grass, Dwarf Fakahatchee, Illicium and Illicium "Ms. Scarlet", Blechnum Fern

### TRANSITION ZONES

Tree Choices: Slash Pine, Wax Myrtle, Dahoon, Holly, White Geiger, Green and Silver Buttonwood  
Palms: Paurotis, Scrub palmetto, Sabal palms  
Shrubs: Dwarf Fakahatchee Grass, Muhly Grass, Dwarf Porterweed, Red tipped Coccolupl, Illicium and Illicium "Ms. Scarlet" (Florida Anise), Buttonwood (green and silver), Spartina

### SUPPLEMENTAL ZONE

During Construction there could be some adjustments to exiting grades to work with the new sidewalk. It can be returned to preexisting conditions, but if approved by residents, potential to supplement their existing landscape so that it ties into the overall project to look like one cohesive design.

## Areas of Roadway where Cross Sections were taken

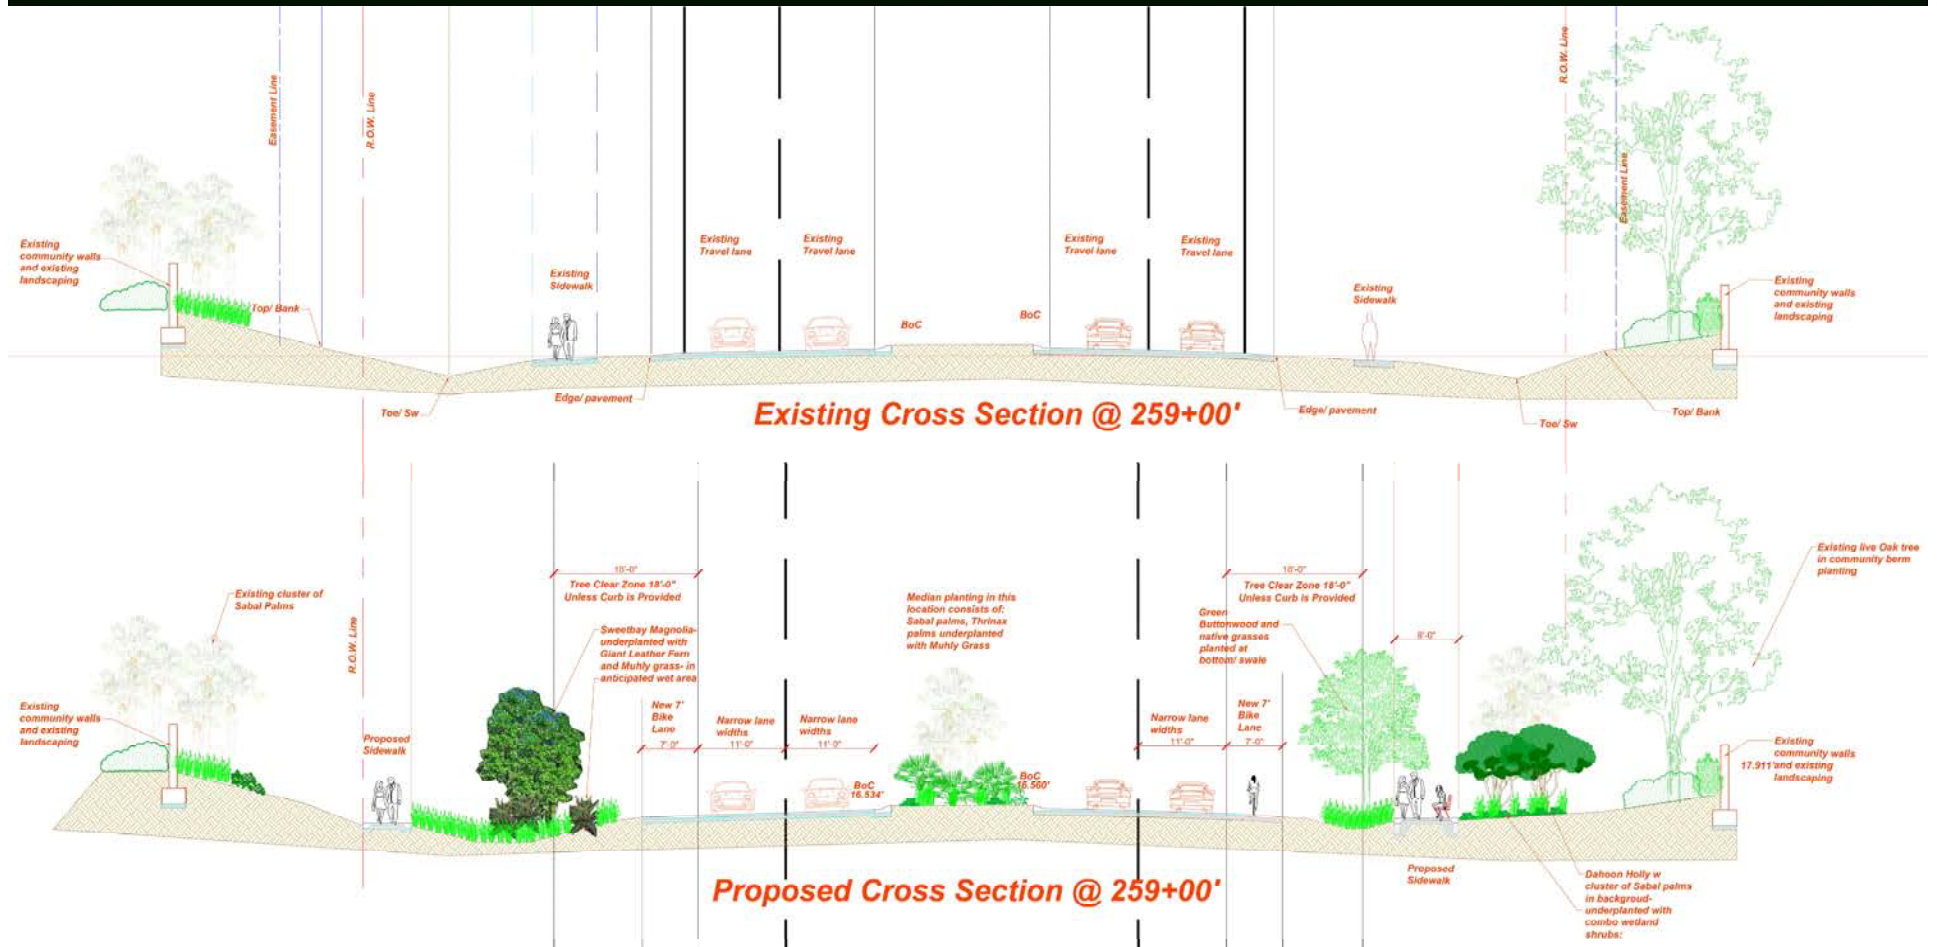

Station 230-232

Station 257-260

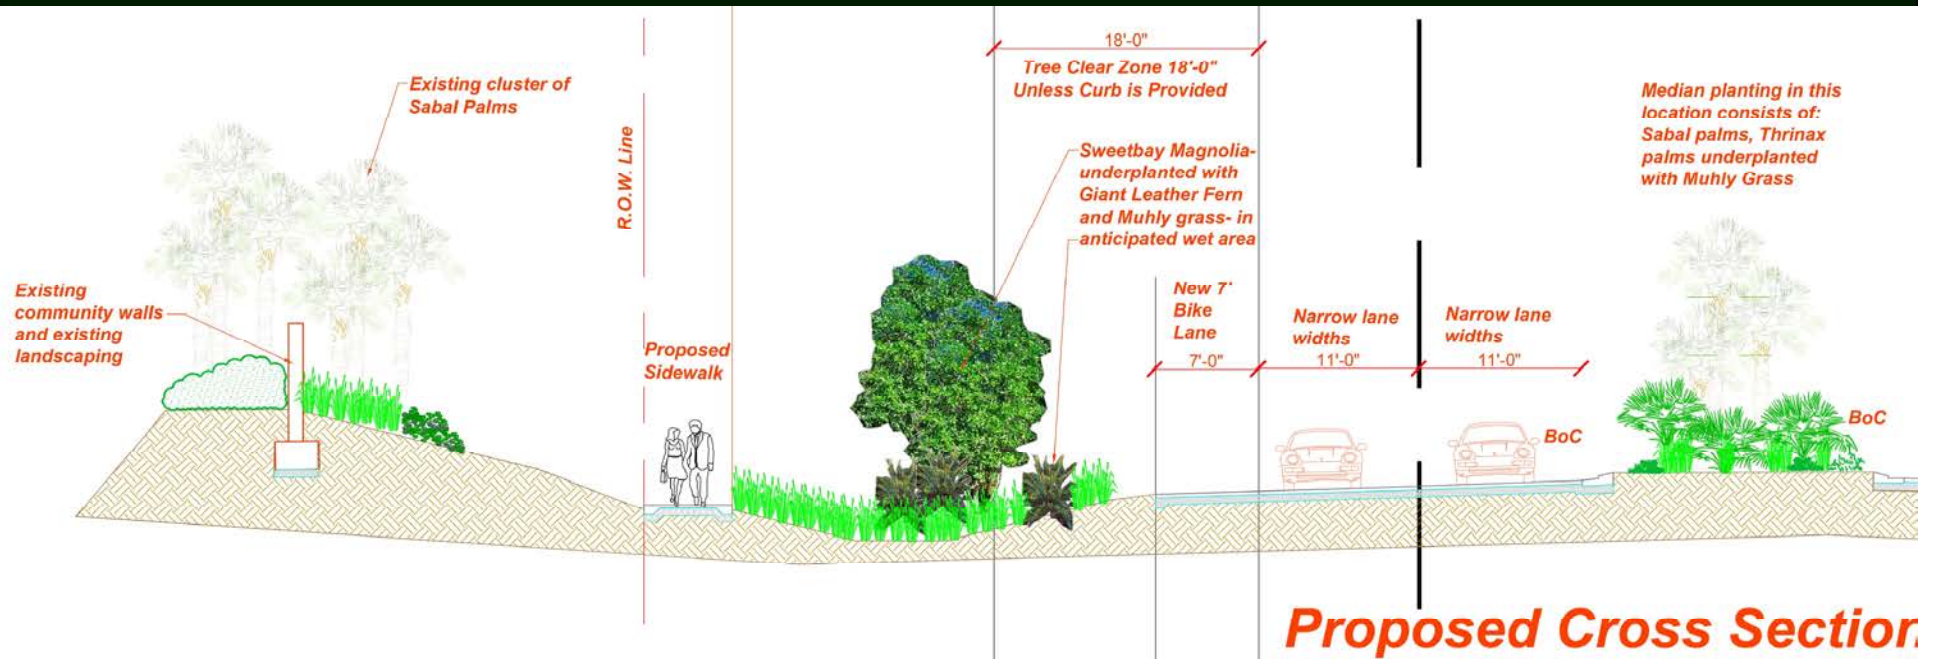

Station 297

# Existing and Proposed Cross Section through R.O.W. @ Station 259

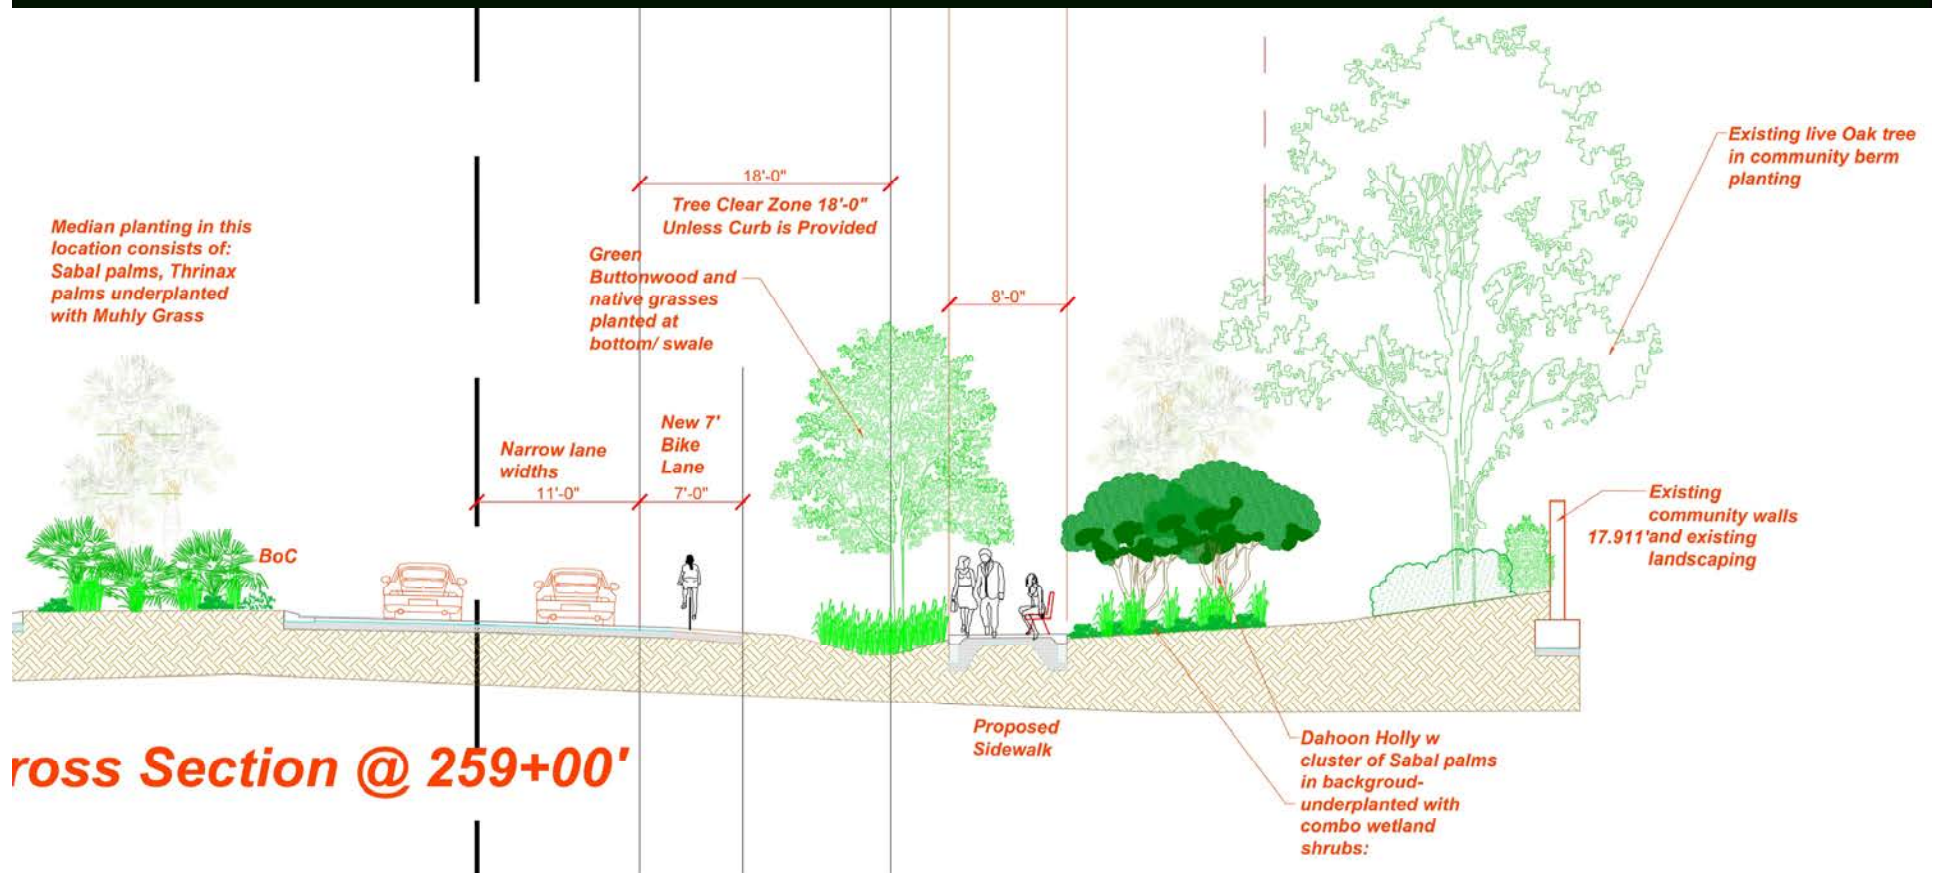

# Existing and Proposed Cross Section through R.O.W. @ Station 259

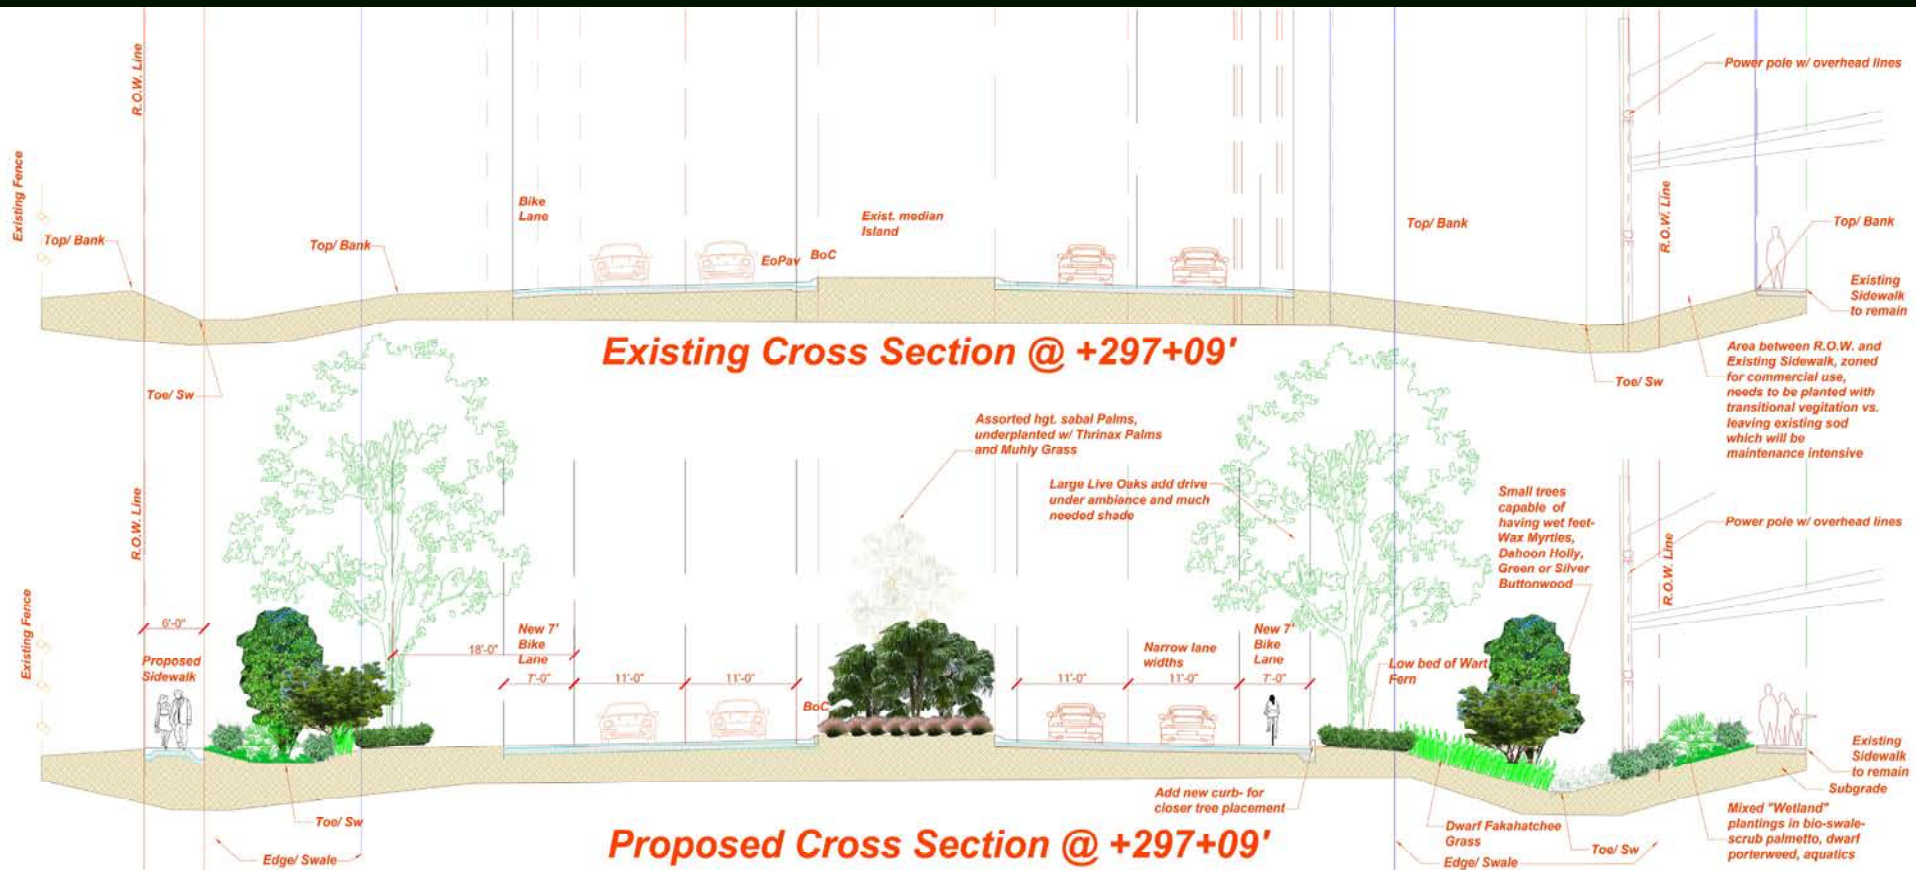

# Existing and Proposed Cross Section through R.O.W. @ Station 259

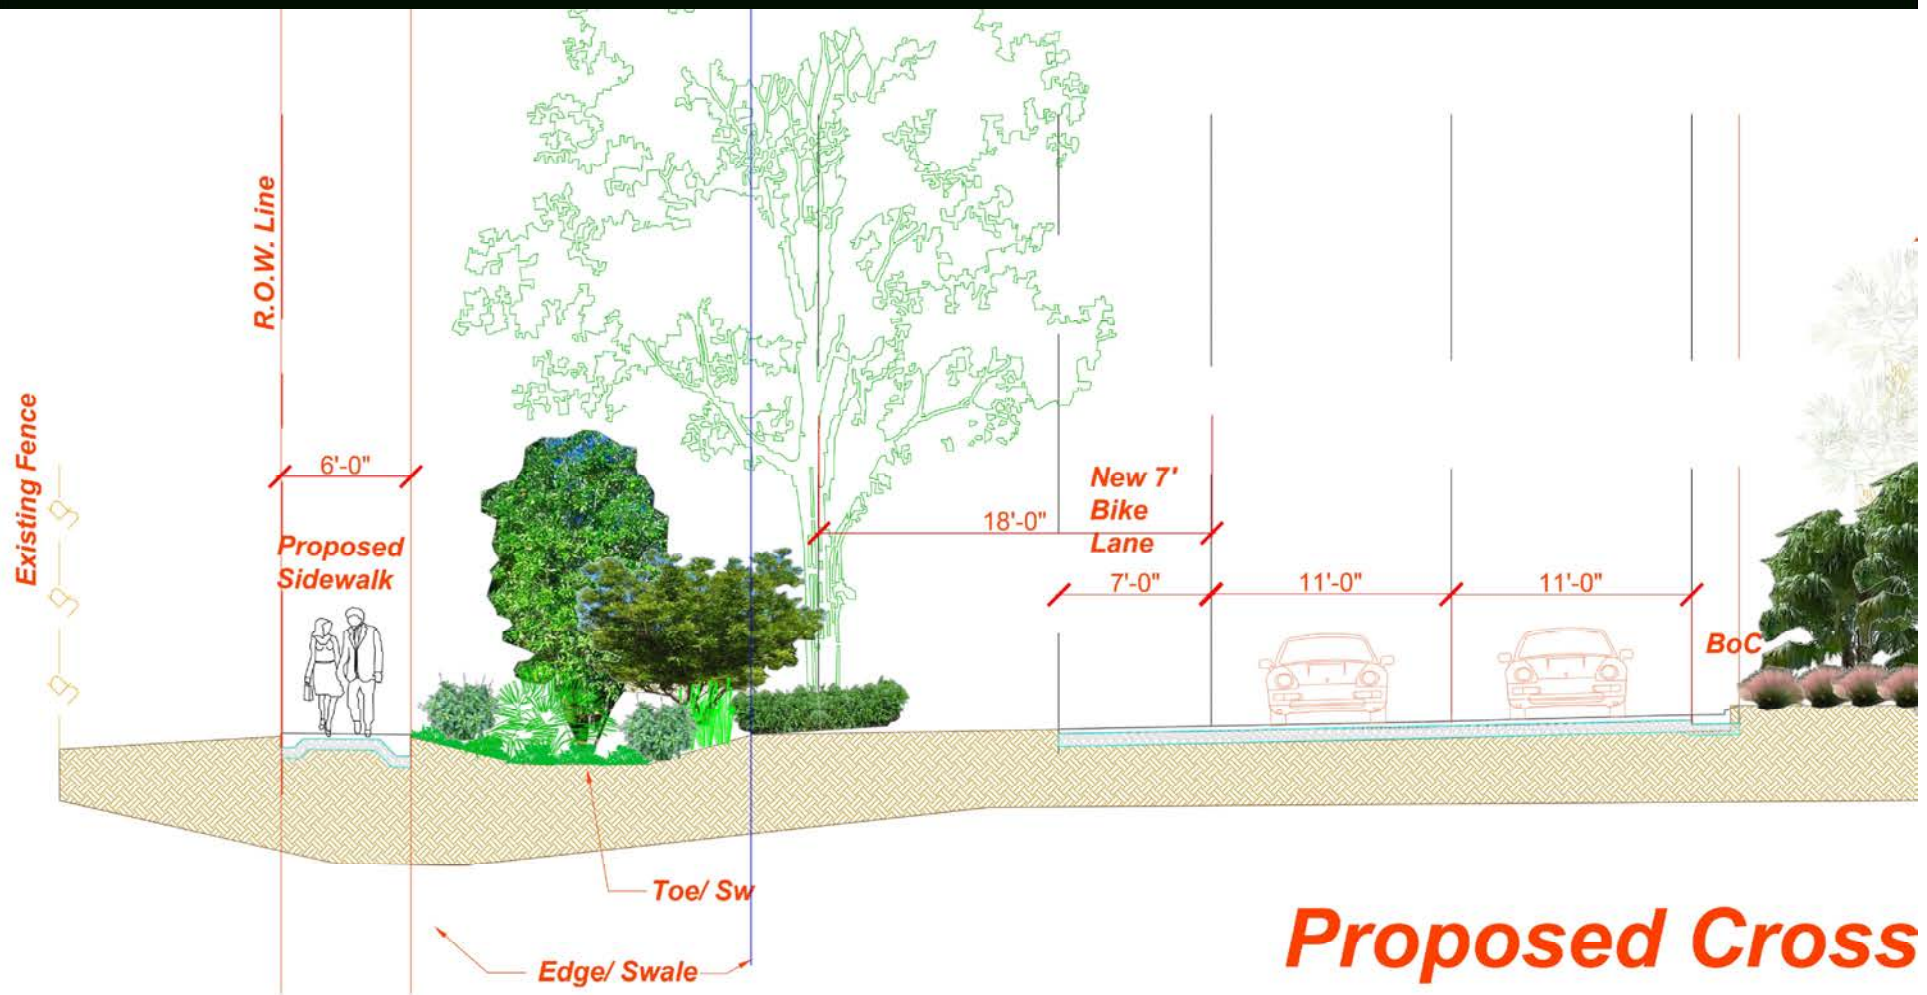

# Existing and Proposed Cross Section through R.O.W. @ Station 297

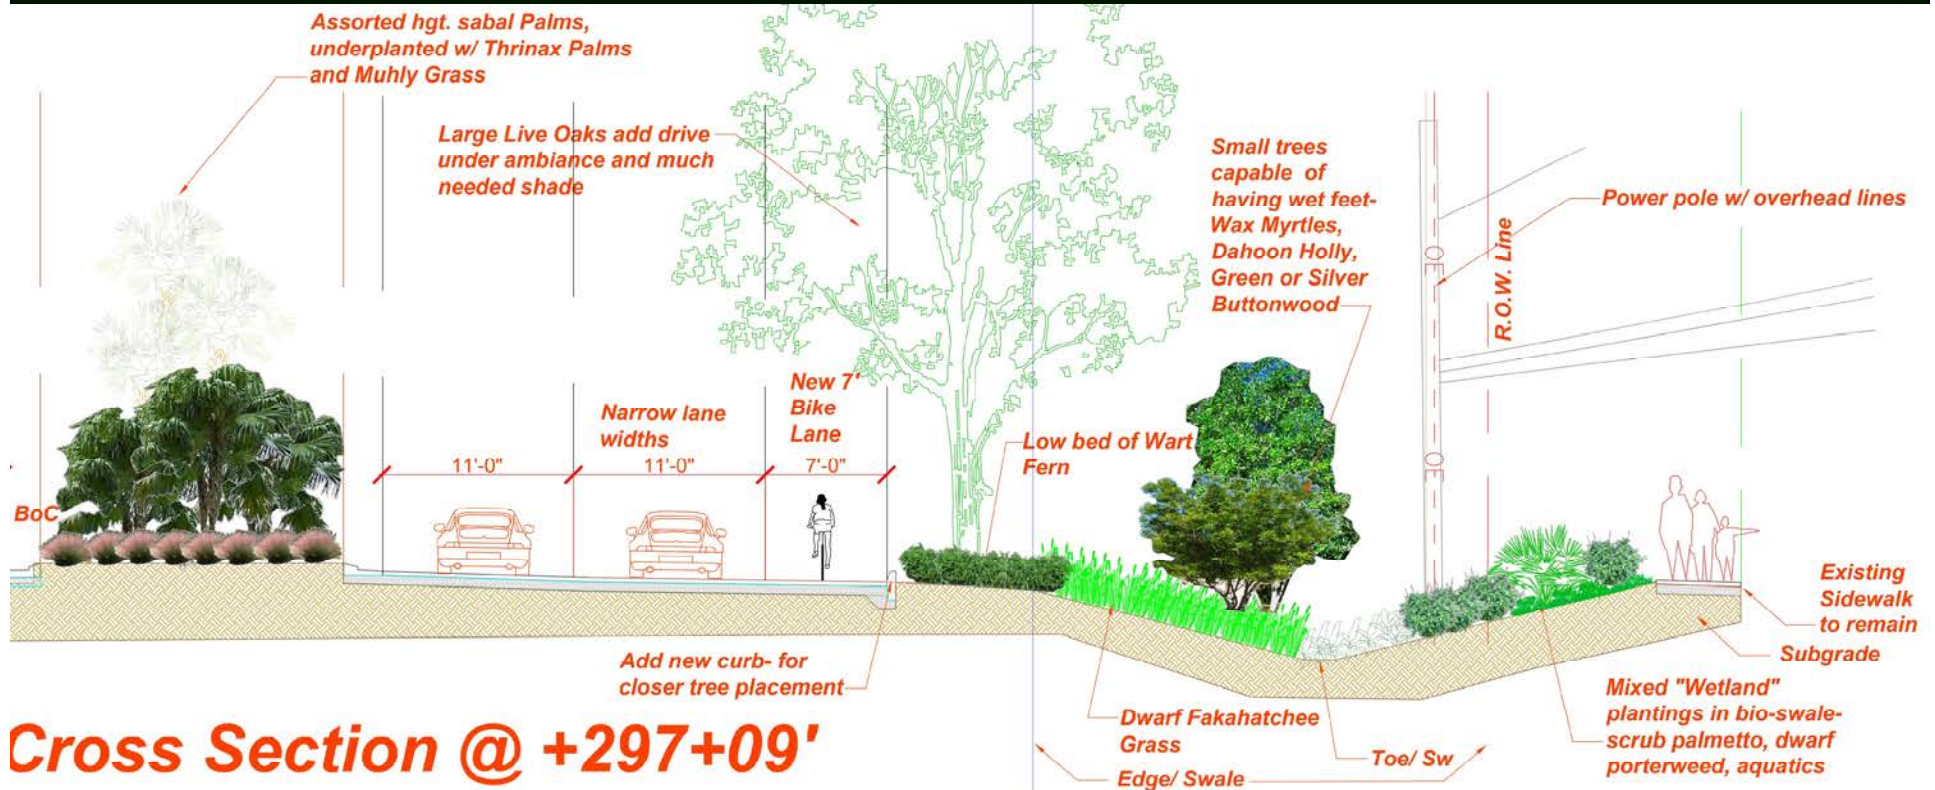

# Existing and Proposed Cross Section through R.O.W. @ Station 297

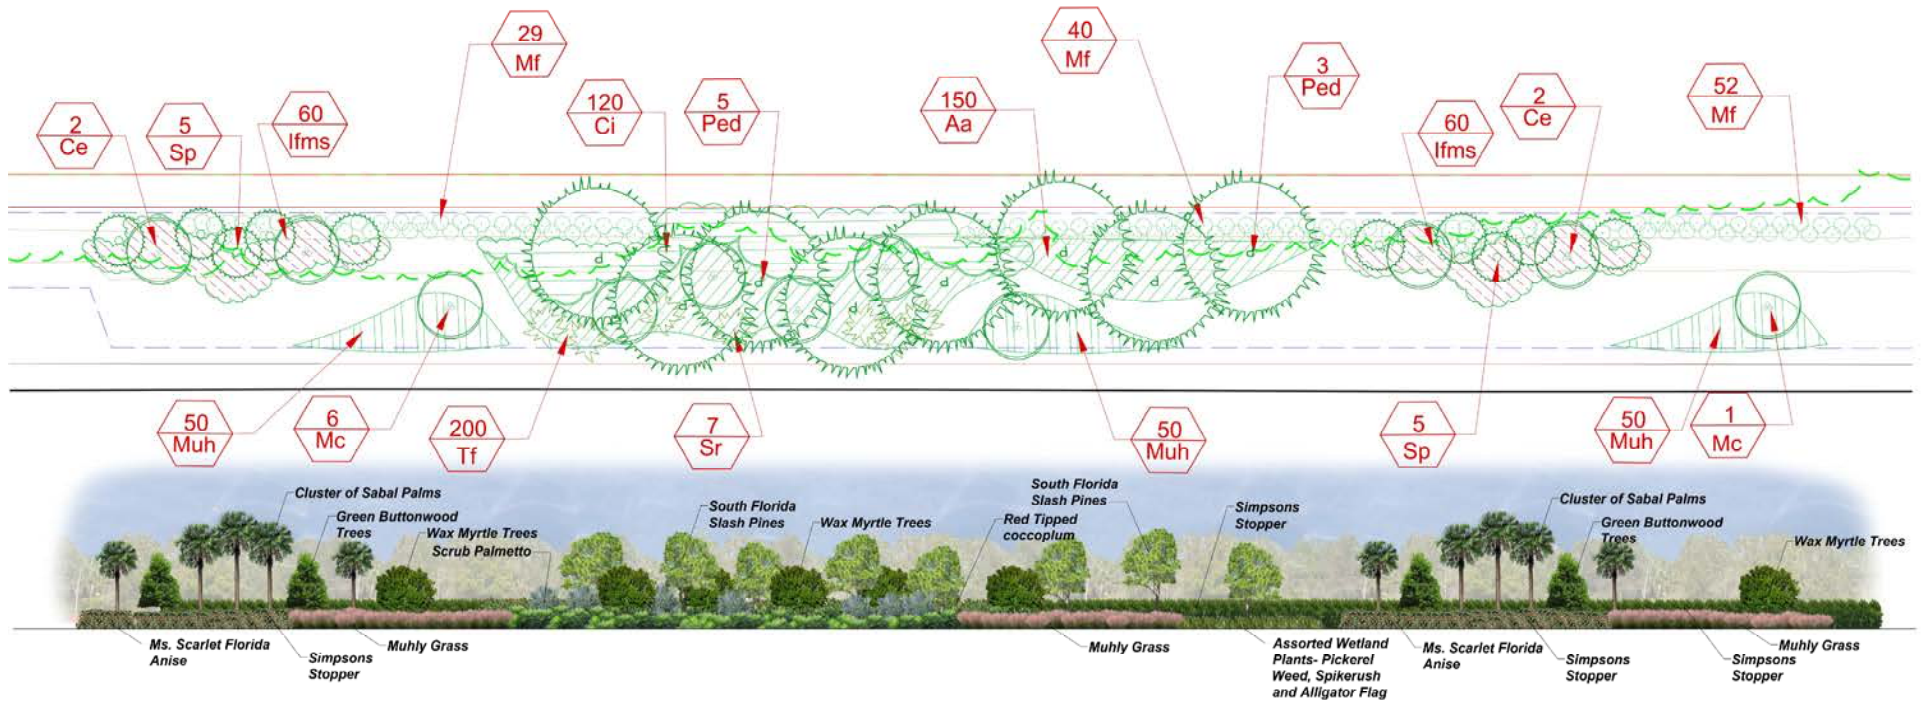

**Proposed Cross**

# Existing and Proposed Cross Section through R.O.W. @ Station 297

# Partial Landscape Elevations Depicting Integrated Plants Choices

**Front Elevation - South Side Sta. 230-232**

# Large Shade Trees

Live Oaks

Japanese Blueberry

"Shady Lady" Black Olive

Street Trees are available in many sizes varying from 65 gal to 400 gal containers to Field Grown.

# Palms

Medjool Date Palm

Sabal Palm

Thrinax Palm

Paurotis Palm

Copernicia Palm

Bismark Palm

Solitaire Palm

## Other Plants Utilized

Carissa Emerald  
Blanket

Wild Coffee

Dwarf Ruellia

Bougainvillea

Panama Rose

Variegated Dwarf Schefflera

Silver Saw Palmetto

Green Island Ficus  
Coontie Fern

Dwarf Fakahatchee

Variegated  
Asiatic Jasmine

Wart  
Fern

# Native Trees Capable of Wet or Dry Conditions

Green Buttonwood

Sweetbay Magnolia

Florida Slash Pine

Wax Myrtle

Pigeon Plum

Dahoon Holly

Florida Red Maple

# Native Plants Capable of Wet or Dry Conditions

Green and Silver Buttonwood

Florida Anise  
'Miss Scarlet'

Florida Anise

Muhly Grass

String Lily

Dwarf Porterweed

Red-tip and Horizontal Cocoplum

# Native Wetland Plants – Bottom of Swale Conditions

Spikerush/Eleocharis

Blue Flag

Leather Fern

Pickerelweed

Duck Potato

Alligator Flag

Blechnum Fern

# Criteria the Irrigation System was Designed With

The existing wells were only designed to water the median and not the full R.O.W. area. One of these wells has been converted to only using potable water because of a poor quality, shallow well. The other, while still using well water, is not able to draw enough water to irrigate in the short 8 hour window we are required to comply with.

- 3 New Wells, driven to the proper depth, and using the right diameter pipe will be utilized to minimize the Mainline size which saves thousands of dollars.
- The System has been designed to be spot specific to recognize the different zones we established in our cross sections.
  - Bottom of swale has moisture sensors that will turn off the zone when wet.
  - Sod requires twice the amount of water that shrubs do, so it is on a separate zone
  - Trees have bubblers to help establish, which can be turned off at a later date

# Plant Material List Trees Only

ESTERO PARKWAY - Budget Breakdown							
TREES							
SYMBOL	BOTANICAL NAME	COMMON NAME	NATIVE	SIZE / CALIPER @ INSTALLATION	QTY	Unit Price	SubTotals
Ar	Acer rubrum	RED MAPLE	YES	16'-18'hgt.x 12'spr.	34	\$750	\$25,500

## Overall Budget Summary

Overall Landscape Budget: \$3,500,000

Landscape Budget: \$2,100,000 - Irrigation Budget: \$1,400,000

Grand Total Estimate of All Plant/Sod Material to Date: \$1,550,438

Estimate of Irrigation Budget to meet or be below established \$1,400,000

\*Note: These are designer estimates which could change based on when the project is available to be landscaped. They do not include a contingency, contractor overhead and profit amounts, or any clearing and grubbing or tree relocation.

### Summary of Plants Utilized

22 Different Tree Varieties – 13 of which are Florida Natives

1,169 Total Trees

817 Native Trees = 69.9%

39 Different Shrub Varieties – 24 of which are Florida Natives

57,570 Total Shrubs

42,912 Native Shrubs = 74.5%
