

WORKSHOP ITEM SUMMARY SHEET
VILLAGE COUNCIL MEETING
January 22, 2020

Agenda Item:

Coconut Road Roadway Improvement Update

Description:

The Coconut Road traffic studies prepared for the Village have indicated future intersection improvements will be required at US-41, Coconut Shores Blvd., Olde Meadowbrook Blvd., and El Dorado Blvd. In addition, roadway widening will likely be required east of Coconut Shores Blvd. to US-41. The studies have only indicated these improvements will be required. They did not provide preliminary designs, assess how practical each improvement would be or determined potential costs.

Staff is recommending The Village obtain the services of an engineer with an expertise in roadway and roundabout design to provide the following services:

- Assess the feasibility of installing three roundabouts (Coconut Shore Blvd, Olde Meadowbrook Blvd. and El Dorado Blvd.)
- Assess the feasibility of roadway and turn lane improvements approaching US-41
- Prepare preliminary design plans and cost estimate for each

This project is not included in the 2019-2020 Fiscal Year budget. Adding this project would require a budget amendment. Staff would like to get Council input on potentially moving the preliminary design of the Coconut Road improvements up into the 2019-2020 fiscal year budget.

If Council would like to move this project forward, Staff will prepare a budget amendment and work to identify a qualified consultant. Staff will either use the Misc. Service Contract or advertise a separate RFP for this specific project. This will depend on the qualifications of the consultants in our Misc. Service Contract.
