Re: Estero on the River Structure Demolition

Bid # RFB2020-06
Estero FL

Scope of Work

With the letter is the bid form containing prices for 11 areas including structures, asphalt, concrete slabs, septic tanks, capping of wells.

The prices for each area include demo permit fees, demo of the structure, pumping of the septic tank and removal, filling in of the hole if there is one, minor removal of vegetation to get there and do the demo, capping off well if found, grading the area flat and hydroseed the disturbed area.

Note: Silt fencing will not be installed due to the jungle like terrain.

Containers and dump fees for demo are included in each area.

Includes labor and equipment to complete scope.

Please understand pricing for each area is based on Southwest Builders being the demo contractor for the entire demo part of the project.

The pricing to demo extra septic tank over 4 is listed on the main sheet. The price includes pumping, removal, fill dirt, grading and hydroseed while we are on site.

Structure 3 has a large bee's nest to be removed that is included in that areas price. If others need to be removed the cost will be passed along at that time, with the invoice to justify cost.

Asbestos mediation will be done before demo work can start.

We thank you for the opportunity of allowing us to submit a proposal to you for this work.

Sincerely,
Southwest Builders Inc.

Richard Iafeliece
