

## CIP Project Summary Broadway West Improvements

---

CIP Category: Roadway

Design :	\$	316,200.00
Construction :	\$	1,053,800.00
Total:	\$	1,370,000.00

### Project Description:

This project will include roadway and drainage improvements along Broadway W from US-41 west to the end of the roadway. The project will first determine the improvements that can be accommodated along Broadway West. Improvements could include the following:

- Resurfacing
- Widening
- Drainage Improvements

### Project Justification:

The Village of Estero has received many resident complaints about road safety, the roadway width and drainage along Broadway West.

This project will improve roadway safety by increasing the roadway width. The roadway is currently somewhat narrow compared to other roadways.

Several communities north of Broadway drain into the roadside ditch. Improvements will be made to the ditch to increase the flow and treatment of water in the ditch. The existing ditch slope off the roadway are relatively steep. The project will try to flatten the slopes to improve traffic safety.
