

CIP Project Summary
Coconut Road/US-41 Intersection Improvements

CIP Category: Intersection

Design :	\$	186,200.00
Construction :	\$	387,900.00
Total:	\$	574,100.00

Project Description:

Construct intersection improvements along Coconut Road east of US-41 to improve traffic flow and increase vehicle stacking at US-41. Improvement could include the following:

- Signal Retiming
- Extend EB right turn lane
- Extend WB dual left turn lanes
- Extend SB right turn lane
- Add second NB left turn lane

Project Justification:

As outlined in the Coconut Road Traffic Study, the Coconut Road/US-41 intersection is nearing/exceeding the traffic volume that can be accommodated by the existing lanes of traffic. Improvements will be required to increase the volume of traffic through the intersection to reduce traffic delays.
