

CIP Project Summary
Estero River Sediment Removal (RR - Sandy Ln)

CIP Category: Stormwater

Design :	\$	162,000.00
Construction :	\$	362,900.00
Total:	\$	524,900.00

Project Description:

Remove sediment that has built up in the Estero River between the railroad and Sandy Lane.

Project Justification:

Sediment within the Estero River can limit flow through the River and create flooding. The Village's Stormwater Master Plan recommends removing some sediment build up in the river.
