| Design : | \$ | 149,100.00 |
| Construction : | \$ | 2,277,000.00 |
| Total: | \$ | 2,426,100.00 |

Project Description:

Remove sediment that has built up in the Estero River west of US41.

Project Justification:

Sediment within the Estero River can reduce navigation safety. The Village of Estero hired a consultant to analyze the Estero River and provide recommendations to improve the river. Recommendations have not yet been provided, but they could include removing sediment from the River.

Maintenance:

To maintain the river cross section after sediment is removed maintenance could be required. The extent of this maintenance is not yet know but will be analyzed by the Village's Consultant.
