

CIP Project Summary Sandy Lane Street Lights

CIP Category: Street Lights

Design :	\$	28,600.00
Construction :	\$	300,000.00
Total:	\$	328,600.00

Project Description:

Install street lights along Sandy Lane.

Project Justification:

While Sandy Lane does not currently have bike/ped facilities, the Bicycle and Pedestrian Master Plan recommends installation of shared use path. Street lights would improve roadway safety and after a multi-use path is installed, street lights will allow bicycles and pedestrians to use the path at night.
