

CIP Project Summary

Via Coconut Point RAB Bicycle Improvements

CIP Category: Bicycle & Pedestrian

Design :	\$	162,000.00
Construction :	\$	303,900.00
Total:	\$	465,900.00

Project Description:

Modify the two roundabouts on Via Coconut Point to improve bicycle and pedestrian safety.

Improvements would include the following

- Bicycle ramps

- Expand sidewalks around each roundabout to 10-ft

- Relocated crosswalk closer to roundabout to improve pedestrian visibility

Project Justification:

As more development occurs along Via Coconut Point, bicycle and pedestrian traffic is expected to increase. The existing roundabouts do not meet current standards for bicycle and pedestrian facilities. The proposed project will improve the bicycle and pedestrian safety at the roundabouts.
