

CIP Project Summary
US-41/Williams Rd Intersection Improvements

CIP Category: Intersection

Design :	\$	210,000.00
Construction :	\$	60,400.00
Total:	\$	270,400.00

Project Description:

Construct intersection improvements on US-41 at Williams Road. Improvements could include the following:

Convert the gore area into a second southbound left turn lane

Project can only start after Williams Rd is widened to accommodate the second lane of traffic from US41.

Project Justification:

The Village Wide Traffic Study identified the need for an additional southbound turn lane at US41 and Williams Road. As traffic volumes continue to increase at the intersection of US-41 and Williams Road, traffic volumes will exceed the intersections capacity. The proposed intersection improvements will increase the volume of traffic that can be accommodated by the intersection, reducing traffic delays.
