

CIP Project Summary

Williams Road Bike/Ped Improvements

CIP Category: Bicycle & Pedestrian

Design :	\$	300,000.00
Construction :	\$	1,162,400.00
Total:	\$	1,462,400.00

Project Description:

Install bicycle and pedestrian improvements from Via Coconut Point to Three Oak Parkway.

Project Justification:

The Village of Estero's Bike/Ped Master Plan identified the lack of safe east/west bicycle and pedestrian corridors as a major deficiency in Estero. Construction of bicycle and pedestrian improvements along Williams Road will provide a safe east/west corridor between two major north south corridors, Via Coconut Point and Three Oaks Parkway. It will also improve access to Estero High School and the future elementary and middle school.
