As we know, the Estero River is in great need of help because of sediment and debris blockage, and bacteria. We know that we will be under water when the next major storm occurs.

According to the actual expenditures, Estero has spent only \$1159 on storm water improvements from FY2018 to FY2020 (see page 27 of the Capital Improvement Project funds).

I ask that you bring in the FY21-22 budget for storm water of \$1,011,050 into FY20-21 to get as much done this year as possible.

The Estero River needs to flow!

Thank you.

As we know, the Estero River has been designated as a "special water" - and it is IMPAIRED from bacteria. That doesn't make sense! Just think of how the River will be in one to two years if septic systems are not converted to sewer before then. I remember hearing that it will take 2 years before shovels are in the ground.

Please establish an action plan to convert systems as soon as possible.

Also, can we get State and/or Federal funds to help?

Thank you for your attention to this matter.
