Genova EPD Zoning Amendment

**Comments**

We are behind the beautiful Barron Collier Genova 3 project. We think they have added luxury villas and townhomes that will be blend beautifully with Genova 1 and 2 and be a great addition to the whole project. We would like to see this as a finished project finally and applaud BC!!!

**Comments**

Please ensure all sidewalks and cycling/pedestrian pathways are 12 feet wide as this will help achieve the goal of making Estero a bikable and walkable community.

Pelican Sound 2022-15 Pickleball

**Comments**

## PUBLIC COMMENT CARD : Entry # 37262

The ordinance contains the following paragraph:

The Pickleball Courts within the Golf Maintenance and Storage Area shall have an eight-foot tall fence and gates installed with 1/8 inch thick sound deadening black Acoustifence material to ensure that the sound generated by the pickleball facility does not exceed the maximum of 66 dBA. The black Acoustifence material will be made to meet the dimensional standards of the eight-foot fence associated with the pickleball courts. Each sound deadening curtain must be made of Industrial, UV resistant Acoustifence material.

But it does NOT state at what distance the sound is to be measured; nor from what location as referenced by the 4 sides of the court.

Also, the following is very imprecise:

If excessive noise complaints are received regarding noise from pickleball play, the applicant shall have 30 days to submit a noise mitigation plan to the Village staff for review.

What is excessive? An ordinal number? A percentage of doors? A percentage of people? And who decides?

Leaving the criteria so vague and arbitrary is not only useless, it is asking for confusion, clarification and controversy. We pay the attorneys enough money already.

Pelican Sound - Pickle Ball

**Comments**

## PUBLIC COMMENT CARD : Entry # 37261

The existing noise parameter (65 dB) is not appropriate for evaluating pickle ball. The pickle ball sound of paddle/ball/ground is a repetitive and irritating sound at far fewer decibels.

Every competent sound engineer would tell you that the human ear, especially as we get older, is extremely sensitive to sounds in the frequency range generated by pickle ball (2-4 kHz). Think of the "Crack" of a home run that can be heard well above the noise generated by thousands of fans. Imagine that noise repeated 15, 20 or even 30 times a minute.

And it's not just the homes. Most developments have a close by pool, a cabana, an adjacent tennis court, maybe bocce, or even an outside patio/dining area. All of these will suffer from the noise generated by pickle ball.

Even at say 50-55 dB and even 200-300 feet away, the sound is irritating.

I request that before you vote to approve ANY pickle ball that you visit a playing court and listen, simply listen. Take a sound meter with you if you want. Measure the sound close to the court. Then say 20 feet away; then 50 feet. You will still hear - loud and clear - the infamous Plunk, clack, whack, plink.

If you have never even heard it, I honestly don't know how you could in good conscience, possibly vote to permit it.

George Molnar

Approval of design of Genova 3 by Barron Collier

**Comments**

We are very pleased with the latest design of Genova 3 by Barron Collier with CC homes. The BC partners have gone above and beyond to work with our community to address all reasonable concerns. We feel that this latest design will incorporate beautifully with the rest of our community and offer a new product that will be very well received by Genova and those that will buy here in Genova 3. We encourage The Village to approve this. At the recent meeting here at Genova this new design was well received by the majority of Genova. We have waited for a long time for our beautiful community to be completed. This vacant corner on Corkscrew is an eyesore in this beautiful village of Estero.

Thank you.
