Village of Estero – Design Review Board
C/O Mary Gibbs, Director of Community Development
9401 Corkscrew Palms Circle
Estero, FL 33928

RE: **Autumn Leaves**

Dear Mary:

Per our recent conversations, please find attached information pertaining to changes to the proposed project sign. The proposed changes are primary colors and the actual sign face itself. All of the previous information and design elements proposed not associated with the sign face are consistent with the plans and drawings previously submitted. The proposed changes to the actual sign face are included in the attached PDF file.

Changes in colors are noted and have been made to remain consist with the final colors and materials chosen for the building. The previous colors proposed were more off white in nature as the colors executed are more ochre in nature. Both are consistent with the desired themes in Estero and the architecture of the project. The material color change in the applied stone is also more red-brown in nature versus the previous white-grayish theme. This change is also more consistent with the colors executed. Please see the attached photos against the previous graphics submitted.

Also attached is the proposed sign face design (as a separate PDF File). This is different from the previous design presented at the DRB meetings on the subject. The Applicant has opted to go with the sign company's design that executes these signs for their projects throughout the Country.

We hope that the Design Review Board will find this modifications to be both consistent with the design intent previously presented and current codes applicable.

Sincerely

LAND ARCHITECTS, INC.
